FIX-IT STARTER KIT

8 fixes every guy should know. The guy who can fix things is the guy everyone calls.

01 Flat bike tire

Flip the bike, pop the tire off with a spoon handle, find the hole (listen for the hiss), patch or swap the tube, pump to the number printed on the tire's side.

02 Wobbly chair or table

It's almost always a loose bolt. Flip it over, hand-tighten everything, then snug with a wrench. Sixty seconds, hero status.

03 Frozen phone or laptop

Hold the power button 10 seconds for a force restart. Fixes 90% of 'it's broken.' If not: update, then restart again.

04 Loose screw that won't grip

Stuff a toothpick or two in the hole, snap flush, re-drive the screw. The wood filler trick pros use.

05 Slow wifi

Restart the router (unplug 30 seconds), move closer, or plug in a cable. Test before and after at speedtest.net so you can prove you fixed it.

06 Stuck zipper

Rub a graphite pencil tip on the teeth, then work it gently. Never yank — that's how zippers die.

07 Squeaky door

A drop of any oil (even cooking oil on a paper towel) on the hinge pin. Swing it a few times. Silence.

08 Clogged sink

Pull the stopper, fish out the gunk with a bent wire hanger, run hot water. Gross for ten seconds, legendary forever.
